

## TEACHING AND EDUCATIONAL-METHODICAL WORK OF THE DEPARTMENT

Students of the 2nd, 3rd, 4th, and 5th years study at the department. Second-year nursing students will study "Healthy Lifestyle," second-year nursing students will study "Nerve Disease Nursing," and second-year medical students will study "Valeology."

Third-year medical and preventive students will study neurology and medical genetics, traditional medicine, healthy lifestyle, and physiotherapy.

The 4th-year program covers dentistry, medical prophylaxis, and neurology in the field of medical biology.

5th-year pediatrics students are taught pediatric neurology.

Classes are conducted in accordance with established procedures based on regulatory documents. (qualification requirement, curriculum, model plan, etc.)

In order to create conditions for students, a bank of lectures on the subjects taught has been prepared, and the necessary textbooks, teaching aids, methodological manuals, etc. have been posted on the Hemis platform.

Experienced professors and teachers of the department annually publish textbooks and teaching aids based on the curriculum approved by the institute. The provision of the latest scientific literature and textbooks is at a high level.
