

Scientific circles

In the 2024-2025 academic year, 5 student scientific circles were established at the Department of "Hygiene and Environment, Epidemiology" for the main subjects taught at the department, with 75 students participating in the circles. For the subject of Children and Adolescent Hygiene "Young Hygienist," Nutrition Hygiene "Nutritsiologist," Labor Hygiene "Experiment," Communal Hygiene "Erudite" and Epidemiology "Epidemiologist" From these clubs, 16 gifted students were selected, who, in addition to club work, were familiarized with the basics of scientific research and research work throughout the year. The department's assistant, responsible for working with gifted students, Koyanbayeva S.Kh., conducted work with them throughout the year according to the plan. At the beginning of the academic year, the head of the department, Candidate of Medical Sciences V.K. Absattarova, and the professor of the department, Doctor of Medical Sciences A.M. Madreimov, conducted seminars where they familiarized students with the rules for writing scientific theses and articles and working with literature on the Internet. Monthly meetings with students and round table discussions were held on the procedure for conducting scientific research. The gifted students of the department achieved great success during the year.

On November 18, 2024, at the International Symposium held at the Medical Institute of Karakalpakstan, "Erudit" circle participant, 304 group student Keunimzhayeva Tolganay received a certificate for her presentation on "The Impact of the Aral Sea Problem on Public Health."
